Notes

¹Serial Number: 66200-10101 Brand Name: PureVax Producer: Merial Vaccine Type: Modified Live

It is not uncommon for a cat to be a little sleepy or not as active after a vaccination. Sometimes they will be sore where the injection was given. Abnormal reactions to vaccines include swollen eyelids or lips and difficulty breathing or swallowing, vomiting and diarrhea. Please call the clinic if you notice any of these symptoms.

Please note that due to state and federal laws, we are unable to process returns on prescription medication. All returnable merchandise must be returned within 90 days of purchase. ****Payment is due at time of service. Balances left on account are subject to 18% annual interest.****

NOTE: All in-house prescription refills require 24 hours notice. Rush orders are available for a fee. Alternatively, check out our online store for medications and monthly prevention! Orders made online are delivered to your door on a schedule. Plus, it's typically cheaper than other pharmacies or local stores. Ask us about it or visit our Facebook page for more information!

If you have an emergency with your pet outside of our normal office hours, please call Madison Veterinary Specialists at 608-274-7772 or Veterinary Emergency Service at 608-222-2455. Both clinics are open 24 hours a day, 7 days a week to assist you with ANY situation.
